

ATC UV Curable Liquid Coatings

Date: August, 2016

Efficient, effective, and safe while enhancing your images with the highest quality of protection. ATC's UV curable liquid coatings can be used for a wide range of applications including business cards, direct mail pieces, wallcovering, and POP signage. Our extensive range of UV coatings cover all of the applications seen in the printing and packaging market today.

Alliance Technology Corp.

Formulated especially to be compatible with ATC's off-line UV roll coaters. Our line of UV curable liquid coatings cure in less time with superior results. We offer unique products like ATC's UV Flexi coatings. These coatings are not only great for flexible medias such as PSV and wall covering, they can also be used to "prime" coat substrates and top printed to increase ink adhesion.

Coatings are available in 1-gallon bottles, 5-gallon pails, and 50-gallon drums.

Coating	Product Code	Description
ATC Digi Gloss	DG-9053	High Gloss UV curable general purpose coating designed for litho, digital, photo, and print press markets. Its viscosity is ideal for a smooth lay down and can be used for two-sided coating work
ATC Digi Matte	DM-9790	Matte Coating (15 to 25 gloss reading) general purpose UV coating designed for the Litho, Digital, Photo, and Print Press markets.
ATC Sure Grip	SG-1092	Gloss UV curable coating great for creating non-slip surfaces. Good for mouse pads and other non-slip applications for paper and plastics.
ATC Universal STD Gloss ATC Universal Matte ATC Universal Satin	UG-9058 UM-8739 US-9722	Gloss UV curable coating designed for the wide format print market. Excellent adhesion to most of the popular direct printing substrates such as Styrene, Coroplast, and Di-bond. The hard cured surface makes this coating ideal for any rigid application, which is in need of additional scuff/scratch resistance.
ATC UV Soft Touch	UVST-1300	This is a 100% UV Coating with velvet touch. Gloss level at 10. Excellent rub resistance for its feel. Easier to clean and use compared to hybrid or water soft touch coatings.
ATC Dry Erase	DE-9643	Gloss UV curable coating designed for easy removal of Dry Erase markers. Its excellent adhesion characteristics allows for application on an extensive range of substrates.
ATC Flexi Gloss	FG-8222	Gloss UV curable coating with excellent flexibility, ideal for flexible medias such as PSV and wall covering. Also has excellent adhesion to most of the popular direct printing substrates such as Styrene, Coroplast, and Di-Bond. This coating can also be used as a "prime" coat and top printed.
ATC UniFlex OD Gloss ATC UniFlex Gloss ATC UniFlex Matte	UFOD-1028 UFG-9020 UFM-9786	Exceptional flow, flexibility and adhesion over difficult digital inks. The OD is for outdoor use. Can be used to coat both sides of a product. The product group is flexible and can adhere to a variety of paper and plastic surfaces.
Solar Gloss	ATC-UVSG	High-end Gloss UV curable coating with excellent chemical resistance and build in UV inhibitors; ideal for rigid and flexible outdoor graphics to help reduce color fading and discoloration.
ATC White	SOW-749	High Density White for single print applications to use on clear films and plastics. Use as a backing behind print or it will accept direct print.
ATC INKO Cleaner	IC 4589	Very effective cleaner for both UV and AQ coatings. Reduces the need of alcohol to clean the UV or AQ coatings. As an all-purpose cleaner for your entire working environment (floors, press covers, and tools)
